

**Image-to-Print
Printing Technology & Innovation Days for Flexible Packaging
Ho Chi Minh City, Vietnam | 19 April 2017**

The “Image-to-Print” roadshow set up by Janoschka, Windmüller & Hölscher, Sun Chemical and Nordmeccanica will be stopping in Vietnam next.

The touring event, which has been running with huge success since 2009, is dedicated to supporting local printers, brand owners and the finishing industry. The workshops provide an insight into the best practices of gravure and flexographic printing and highlight global trends in the packaging industry.

Again in Ho Chi Minh City, the focus will be on the requirements and conditions of the local market. The program focuses specifically on market developments, strategies and technical innovations in printing inks and printing tools as well as printing and laminating machines for gravure and flexographic applications.

Besides presentations and think tank discussions, the agenda of the conference will also include a visit to Asia Pacific Engravers, one of the leading manufacturer of rotogravure printing tools and prepress partner for the FMCG and Tobacco market. The newly built production site, operative since late 2016, includes state-of-the-art rotogravure cylinder production in different technologies.

The symposium in Vietnam is the sixteenth stop for the very successful Image-to-Print Roadshow, which has already visited Russia, Malaysia, Thailand, Brazil, Argentina, Dubai, Mexico, Indonesia, China, Vietnam, Italy, Poland, Hungary, Philippines, and China.
